ELIMINATE

Eliminate is a two part coffee stain remover that works on many types of beverage stains, fruit juices, red wine, coffee and tea.

Part A pH: 11.4 Part B pH: 5.7
Mixed pH: 9.7
Packaged: 1 L & 4 L sets

Directions for use:

Mix only Eliminate Part A and Part B together, do not mix with any other chemical product. Pretest in an inconspicuous location for color fastness.

CAUTION: Eye protection and rubber gloves must be worn when working with this product. When both parts of Eliminate are mixed together a chemical reaction occurs. This reaction can cause foam to leak out of the mixing container. Do not put mixed solution in a sealed container, pressure will build, causing container to burst. Keep away from heat source and do not store mixed product.

Mix equal parts of Eliminate Part A with Eliminate Part B in a clean bottle. Saturate the stained area with mixed solution. As the stained area dries the stain will disappear. Stubborn stains may take more than one application.

Mix only the amount needed, any remainder must be disposed of.
