PRO-GEL

Pro Gel uses safe citrus solvents to break down and dissolve oil and protein based stains. Pro Gel has been formulated into a gel to allow the cleaning power to work from the top of the stain downwards. Pro Gel is an effective product for the removal of chewing gum.

Diluted pH: N/A

Dilution Ratio: Ready to Use

Packaged: 1 L

Directions for use:

Ready to use. Test for color fastness before using.

Apply liberally onto spot or stain, agitate with a bone spatula to emulsify the spot. Allow a few minutes for dwell time then blot up stain with a clean white cloth by pressing down on the treated area. Repeat procedure if necessary until the spot or stain is removed. Flush area with clean water.

For gum removal, puncture the surface of the gum to allow Pro Gel to penetrate the underside of the gum.
