## CRYSTAL CAP CLEAN

*Crystal Cap Clean is an encapsulating low moisture cleaner with the added benefit of a fluorochemical for dry soil protection. Crystal Cap Clean has been developed to use with a bonnet and pad, Cimex™, Counter Rotating, Cylinder Brush or Rotary maintenance system. This formulation reduces surface tension, breaks down and encapsulates oily soils into a crystal form allowing routine vacuuming to remove the encapsulated soil from carpet fibres.*

**Diluted pH: 8.7**

**Dilution Ratio: 1:32**

**Packaged: 4 L, 20 L & 205 L**

Directions for use:

*Do not mix this product with any other chemical product. Shake well before using. Pretest in an inconspicuous location for color fastness.*

*Mix 118 ml (4 oz) of Crystal Cap Clean with 3.78 L (1 gal) of hot water. (1:32 Dilution)*

*Vacuum carpet prior to cleaning. Spray diluted Crystal Cap Clean evenly over carpet moistening the surface. Using a bonnet pad buff the moistened area, changing pad regularly to keep clean. When using a brush system simply brush the moistened area. In both applications, once the carpet is dry, routine vacuuming will remove the remainder of the encapsulated loose soils.*

*One gallon of mixed solution will cover approximately 1500-2000 square feet depending on soil conditions.*
